

May Newsletter

As predicted, the ice was out about 3 weeks early! The walleyes and jumbo perch had the feed bag on. With the fish biting and the warm weather, our last days on the ice were some of the best outdoor times we have ever had!

We spent the last week of walleye season in the boat, Brrrrrr!! Open water fishing that early in the spring can test anyone's ability to withstand the cold. As usual, Cindy caught all the biggest fish of the spring, she had two walleyes over 30" in about 4 hrs. She also had several others that anyone would have smiled about. I did however out-fish her in the numbers game. We caught lots of walleyes in the 16 - 18" range that last week of season.

Since the season has been closed, we have been working hard at our little hobby farm trying to get it ready for us not to be there much this summer. We have been working on cutting trees out of the back yard and yes, digging the stumps out by hand! We also replaced one of our dog kennels and have done some fencing improvements. All in all, farming!

Other big news at the Angler's Pro Shop for this summer is our daughter Randi that worked for us last summer is now nursing full time, so we have our other daughter Emily here to help us out to make sure you all get the best service in our area.

We are looking forward to having a great summer and we need you to come see us to be able to have that happen. Remember, ***We Are Your Store!***
